

NIGHT OWLS SOCIAL BOWLING.

We would like to bring to the attention of all our bowling community that it is the responsibility of each member to protect our green.

To ensure that we are meeting the warranty of our new surface there are requirements that should be met by each user.

Footwear: - Flat bottomed shoes should be worn. Joggers with ridges will damage the surface over time.

Dumping of bowls: - "This is the major damage to the surface".

"Dumping" is the term used when a bowler delivers the bowl more than 6 inches or 15.24 centimeters above the surface causing indentations.

To eliminate this damage there are several options a bowler can adopt when unable to bend to deliver the bowl correctly.

DUMP MATS: - There will be a dump mat provided at each end of the lane for use. These will help protect the main surface.

BOWLING ARMS: - Bowling arms are used by many bowlers, enabling them to deliver the bowl without bending.

The captain of each team should ensure that their respective team members meet these requirements for the longevity of our green.
